1. Conceptualization, quantification and modeling of horizontal and vertical transmission in biological and sociocultural sciences
2. Conceptualization, quantification and modeling of micro- and macroevolution in biological and sociocultural sciences
3. Hierarchy theory and the units, levels and mechanisms of evolution
4. How the universal application of evolutionary theories enables new possibilities for inter- and transdisciplinary research and the unification of the sciences

We encourage submissions of (1) concrete models and simulations, (2) theoretical, reflexive talks, and (3) historical accounts on any of the above mentioned topics.
